

Handling of personal data within SNIC

SNIC is a national e-infrastructure hosted by Uppsala University. Uppsala University is the data controller for information handled within the SNIC consortium, and therefore for the processing of data in the *SNIC User and Project Repository (SUPR)*.

For more information regarding how Uppsala University processes personal data, and what your rights are concerning this, please click on the following URL (in Swedish):

URL: <http://www.uu.se/om-uu/dataskyddspolicy/>

For more information on how SNIC processes data, and what your rights are concerning this, please contact *office@snic.se*.

Below follows a description of how SNIC processes data for users in *SUPR*:

- SNIC collects personal data, such as first name, surname, employment, email address, and organizational belonging, as provided during the proposal creation process, or by the creation of a user account in the *SNIC User and Project Repository (SUPR)*, and also through local user accounts administrated by parties within the SNIC consortium.
- SNIC collects personal data, such as IP Address and User History, as required to maintain security guidelines, such as IT security and information security, by parties within the SNIC consortium.
- Personal data processed within SNIC is stored for as long as required for administration, and for technical and / or scientific assessment.
- The Swedish Research Council mandates SNIC to save and process data about users, project proposals, and approved projects. The Swedish Research Council may, after having signed a *Personal Data Processing Agreement* with Uppsala University, access and process data handled within SNIC.
- External scientific reviewers may access user history when reviewing submitted proposals. User history is saved until a decision about purging is taken.
- Personal data is processed by administrators, who are employed by the SNIC consortium parties, and who have administrative access in *SUPR*.
